

OMKAR HIWALE

+91 9422712091 | DevOps Engineers

omkar.hiwale09@gmail.com | linkedin.com/omkarhiwale | Github.com/omkar | [portfolio](#)

OBJECTIVE

Aspiring DevOps Engineer with hands-on experience in AWS, Docker, CI/CD, NGINX, and Linux. Contributed to a live LXP project using GitHub Actions; eager to grow in automation, cloud, and containerization.

EDUCATION

- Maharashtra Institute of Technology (MIT), Aurangabad, Maharashtra**
Master in Computer Application ([MCA](#)) 2023-2025
- SBES Arts & Commerce College, Aurangabad, Maharashtra**
Bachelor of Computer Application ([BCA](#)) 2019-2022

SKILLS

OS & Linux Administration : Linux (Ubuntu, RHEL), Scripting, User & Group Management, System permission's, SSH key, Firewall, Networking

DevOps & Deployment : Git, GitHub Actions, Jenkins, CI/CD pipelines

Containers & Orchestration : Docker, Podman, Kubernetes

Cloud & Hostin : AWS (EC2, S3, IAM), Nginx, SSH

IaC & Config Management : Terraform

EXPERIENCE

Role Name Jan 2025 - Jul 2025
Company Name [NubeEra Technology Pvt. Ltd.](#)

DevOps Role – LXP Project (Learning eXperience Platform)

- Set up servers using AWS EC2 and managed files via S3 buckets
- Cloned code from GitHub and handled environment errors
- Used Terraform to automate cloud infrastructure setup
- Installed and configured software using Ansible
- Created reusable modules for deployment across environments
- Configured NGINX to serve content from S3 and route traffic
- Updated Route 53 DNS records to point domain to EC2 instance
- Ensured service communication by setting up proper networking

PROJECTS

Deploy an Amazon EKS Cluster using Terraform

- In this project, I set up AWS credentials on Windows by creating a AWS directory in my user folder and adding the necessary credentials and config files with IAM user details. I then developed multiple Terraform configuration files (.tf files) to define components for deploying the EKS cluster, including the VPC, subnets, security groups, and the cluster itself.
- Prometheus and Grafana EC2 instances Successfully implemented a monitoring solution for Linux EC2 instances by configuring Prometheus and Grafana. This setup enabled real-time performance tracking and visualization, enhancing system reliability and operational efficiency

CERTIFICATIONS & ACHIEVEMENTS

- Red Hat certified System Administrator ([RHCSA](#)) (Certification ID : 240-167-676)
- Red Hat Certified Specialist in Containers ([Red Hat OpenShift](#))

EXTRA-CURRICULAR ACTIVITIES

Attended #BuildWithAI Meetup by Google Developer Groups — gained insights into GenAI, Firebase, and GKE

- Create a [chat-Bot](#) and Host
